DETAILED ACTION

1. Applicant response to Election/Restriction filed on 5/05/08 is acknowledged; applicant has elected claims 1-11 and has withdrawn claims 12-32 without traverse for prosecution.
Therefore, the above elected claims will be examined.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David K. Sakata on 6/04/08.

The application has been amended as follows:

Please cancel claims 12-32.

In claim 11 lines 1 delete "A machine readable medium" and instead insert—A computer readable storage medium—.

Allowable Subject Matter

3. **Claims 1-11 are allowed.**

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance: The closest prior art of Watanabe et al. (Pub. No: US 2005/0104974) relates to an image processing apparatus and image processing method for automatically improving the contrast of an image obtained using a digital camera or the like (see Technical Field). Further Watanabe provides for the edge data detection unit detects the edge data of the object pixel. The correction coefficient calculation unit calculates the correction coefficient for the edge data obtained by the edge data detection unit. The comparison amount correction unit corrects the average density obtained by the surrounding average unit using the correction coefficient. The improvement amount calculation unit finds the amount to improve the contrast from the corrected average density and the density of the object pixel (See Para.0072 bottom part).

Watanabe failed to teach or suggest for the first pixel representing a blended color derived from the first and second colors, wherein the first and second colors serve as component colors of the blended color; obtaining the camera's measurements of the first and second colors; obtaining the camera's measurement of the blended color; and finding a function that maps the

measurements of the first, second and blended colors into a linear distribution in a color space. As cited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
